KEYSTONE Memorials

Keystone Memorials, Inc. crafted this beautiful monument for Goose Ridge Monuments located in Bozeman, Montana. The monument is crafted out of Wausau Red granite and is unique in many ways. The front face of the monument is slanted allowing the sides to angle and show the CNC relief carving artwork on each side. The family name is polished square raised letters inside a 1" deep panel.

This monument was crafted for a pioneer and internationally recognized leader in digital communications. Mr. Gilhausen will be remembered most for the invention of CDMA communications technology for cell phones.

Polish 5; Slant Face;
Straight Top

Sub Base

7-6 x 1-4 x 0-8

3" Polished Margin;
BRP

Base

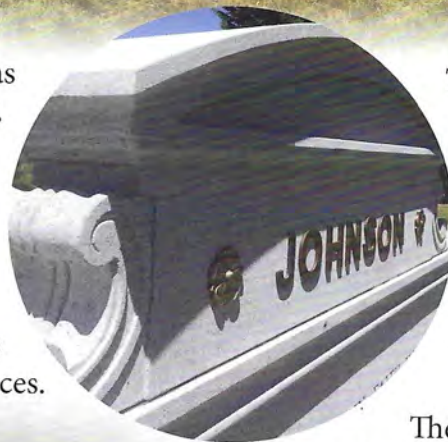

7-6 x 1-4 x 0-8

All Steeled

This astounding granite family monument was created by **KEYSTONE MEMORIALS, INC.** for Goose Ridge monuments in Bozeman, Montana. This monument can be found in Sunset Hills Cemetery also located in Bozeman.

This almost thirteen-foot long monument has a uniform steeled finish amongst all of the pieces.

The remarkable cap features a rounded top with highly detailed scroll-work on each side. This level of detail leaves one in awe of the craftsmanship. Along the front and edges of the cap are several checks and scotia that blend perfectly together.

The tablet portion of the monument continues the detailed checks and scotia work along the top and bottom. There are also two square columns carved into the outer edges to give the monument dimension along with style and flair. The base of the monument is actually set into the concrete foundation.

Keystone did a phenomenal job with all of the details and different dimensions of this monument.
